

1. (Original) A compound of formula (I)

a tautomer thereof or a pharmaceutically acceptable salt thereof

2. (Original) A pharmaceutical composition comprising a pharmaceutically acceptable carrier, and as active ingredient a therapeutically effective amount of a compound as described in claim 1.
3. (Currently Amended) A process for preparing a pharmaceutical composition ~~as claimed in claim 2~~ wherein a therapeutically effective amount of a compound as claimed in claim 1 is intimately mixed with a pharmaceutically acceptable carrier.
4. (Original) A process for the production of a compound of formula (I) as defined in claim 1, comprising cultivating a strain of a microorganism capable of producing a compound of formula (I), recovering the compound of formula (I) from the cultured broth, and optionally, salifying the recovered compound.
5. (Original) A process according to claim 4, wherein the microorganism is a *Micromonospora* species.
6. (Original) A compound according to claim 1 for use as a medicine.
7. (Original) The use of a compound according to claim 1 in the manufacture of a medicament for inhibiting cancer or bacterial growth.

8. (Original) A method for the treatment of cancer, comprising administering to a mammal in need of such treatment an effective amount of a compound of formula (I) as defined in claim 1.
9. (Original) A compound isolated from *Micromonospora* spp JS1035 deposit No LMG P-12525 having antitumour activity.
10. (Original) A compound as defined in claim 9 wherein the compound has a molecular weight of 853 and a molecular formula of $C_{47}H_{67}NO_{13}$.
11. (Original) A microorganism wherein said organism is deposited under deposit No. LMG P-12525.
12. (Original) A microorganism wherein said organism is deposited under deposit No. LMG P-12526..
